Pr – Products Table v1.31

July 2023

General changes

We have been working with Network Rail and Transport for London to ensure that the tables include all classifications for overhead line equipment (OHLE). As a result, we have added codes in the sections for 'Overhead power supply line products' and 'Overhead power supply line support products'. Following feedback from other users, we have made additions and amendments to the classifications in the 'Products' table. Please see below for full details.
